

Second French Presidential Debate: Debate Day Polling & Time Spoken at Debate

While contrasting the polling percentage of candidates before the second debate, with the time spoken in the second debate (ordered from most to least time spoken), the non-linear polling line implies that speaking time in the debate was not directly nor indirectly contingent on polling.

This data was collected from the April 4th 2017 IFOP-Fiducial poll, and the Second French Presidential Debate streamed by BFMTV/CNEWS on April 4th 2017.
